The Department is not responsible for notifying prior requesters of updates, modifications, corrections or deletions. All users have the responsibility to determine whether information obtained from this site is still accurate, current and complete.
- There may be discrepancies between the online copies and the original document. Original documents should be consulted as the definitive representation of the order's content. Copies of original orders may be obtained by mailing requests to the Department of Regulation and Licensing, PO Box 8935, Madison, WI 53708-8935.  - b. Respondent's last provided specimen was determined by the laboratory to have a specific gravity of less than 1.003 and creatinine concentration below 0.2 g/l;
 - c. The collection site person observes Respondent acting in such a manner to provide reason to believe that Respondent may have attempted or may attempt to substitute or adulterate the specimen. The collection site person, if he or she believes that the initial urine specimen may have been adulterated or a substitution made, shall direct Respondent to provide an additional observed urine specimen;
 - d. The last provided specimen resulted in a positive or suspected positive test result for the presence of controlled substances; or
 - e. The Board of Nursing (or any member of the Board), the Department Monitor, or Respondent's supervising health care provider directs that the urine specimen collection be by direct observation.

If either of the above conditions (a) or (c) requires collection of an additional observed urine specimen, the collection of the subsequent specimen shall be accomplished within the required five (5) hours of the request for the initial specimen; the collection of the initial specimen shall not satisfy the requirement that the urine specimen be collected within five (5) hours of the request for the initial specimen.

- 13 The supervising health care provider, treatment facility, laboratory and collection site shall maintain a complete and fully documented chain of custody for each urine, blood or hair specimen collected from Respondent.
- 14 Every urine specimen collected from Respondent shall be analyzed at the time of collection for tampering by measurement of the temperature of the specimen and the oral temperature of Respondent. Every urine specimen collected from Respondent shall be further analyzed at the laboratory for tampering by measuring the creatinine concentration and the specific gravity of the specimen. The laboratory may at its discretion or at the direction of a supervising health care provider or the Board of Nursing or any member thereof conduct additional tests to evaluate the urine specimen for tampering including, but not limited to, pH, color and odor.
- 15 Every urine, blood or hair specimen collected from Respondent shall be analyzed for alcohol, amphetamine, cocaine, opiates, phencyclidine, marijuana, methadone, propoxyphene, methaqualone, barbiturates, benzodiazepines, meperidine hydrochloride or the metabolites of these substances. The Board of Nursing or its designated agent may at any time direct that screens for additional substances and their metabolites be conducted by scientific methods and instruments appropriate to detect the presence of these substances. The laboratory shall conduct confirmatory tests of positive or suspected positive test results by appropriate scientific methods and instruments including, but not limited to, gas chromatography and mass spectrometry.

- 16 All urine, blood or hair specimens remaining after testing shall be maintained in a manner necessary to preserve the integrity of the specimens for at least seven (7) days; and all positive or suspected positive urine, blood or hair specimens remaining after testing shall be so maintained for a period of at least one (1) year. The supervising health care provider or the Board of Nursing or any member thereof may direct that the urine, blood or hair specimens be maintained for a longer period of time.
- 17 For the purpose of further actions affecting Respondent's license under this Order, it shall be presumed that all confirmed positive reports are valid. Respondent shall have the burden of proof to establish that the positive report was erroneous and that the respondent's specimen sample did not contain alcohol or controlled substances or their metabolites.
- 18 If any urine, blood or hair specimen is positive or suspected positive for any controlled substances or alcohol, Respondent shall promptly submit to additional tests or examinations as the supervising health care provider shall determine to be appropriate to clarify or confirm the positive or suspected positive urine, blood or hair specimen test results.
