

# HIGH SCHOOL ARTICULATION

## AUTO TECHNOLOGY, DIESEL TECHNOLOGY, AND COLLISION REPAIR AND REFINISH TECHNOLOGY

Your school has a tremendous opportunity to help its vocational students capitalize on their education and get a head start on postsecondary training that can put each on the path to a rewarding career. By articulating with UTI and NASCAR Tech, your qualified, motivated students can earn advanced placement or discounts in professional technician training programs.

### HOW IT WORKS:

- + Automotive and Diesel students must have graduated from secondary schools accredited by the National Automotive Technicians Education Foundation (NATEF). Collision repair students must have graduated from schools accredited by NATEF or that belong to the I-CAR Industry Training Alliance.\* Students must start their postsecondary training at UTI or NASCAR Tech within one year of high school graduation to benefit from the articulation.
- + Prior to or during orientation week at UTI and NASCAR Tech, articulating enrolled students who want to earn advanced placement are required to take the advanced placement opportunities (APO) test(s) to assess their knowledge level in the eligible course or courses for which they are attempting to receive advanced placement credit.\*\*
- + Each student who earns a passing grade on an APO test will receive credit for that course without needing to take it. The student still can take the same course but at the original tuition price.
- + Each student who does not earn a passing grade on an APO test will be required to take the corresponding course at UTI or NASCAR Tech at the original tuition.
- + Each articulating student who chooses not to bypass any courses with advanced placement will receive a \$1,000 articulation discount toward the tuition total.

UTI's Automotive Technology, Diesel Technology, and Collision Repair and Refinish Technology programs are accredited by NATEF. UTI graduates are well prepared to complete the ASE examination process and may be able to substitute their training for one of the two years of work experience required to become ASE certified.

**Contact your Admissions Representative today for more information!**

### ADVANCED PLACEMENT

#### AUTOMOTIVE AND DIESEL

Advanced placement is offered for up to four eligible UTI core courses in UTI's Automotive Technology and Diesel Technology programs and NASCAR Tech's Automotive Technology program for students who meet the articulation requirements.

#### COURSES NOT ELIGIBLE FOR ADVANCED PLACEMENT:

- Automotive Engines & Repair (ADTC-101)
- NASCAR Engines I (ADTN-140)
- NASCAR Engines II (ADTN-141)

#### COLLISION REPAIR

Advanced placement in UTI's Collision Repair and Refinish Technology program is offered for up to four eligible UTI collision repair courses corresponding to the following UTI courses provided a secondary school has an active I-CAR Industry Training Alliance membership:

#### CRRT ELIGIBLE COURSES

- Exterior Panel Alignment (CRRT-101)
- Welding & Cutting (CRRT-105)
- Introduction to Refinishing (CRRT-108)
- Exterior Panel Repair II (CRRT-124)

*Requires I-CAR module STS01 and a two-hour, hands-on dent repair test*

\*Each collision repair student from a program that is not a member of the I-CAR Industry Training Alliance but has a NATEF Collision Repair certification is only eligible for a \$1,000 articulation discount. \*\*Failure to test prior to or during orientation week will disqualify a student from advanced placement.

# HIGH SCHOOL ARTICULATION

## MOTORCYCLE TECHNOLOGY AND MARINE TECHNOLOGY

Your school has a tremendous opportunity to help its vocational students capitalize on their education and get a head start on postsecondary training that can put each on the path to a rewarding career. By establishing articulation agreements with MMI, your qualified, motivated students can earn advanced placement or discounts in professional technician training programs.

### HOW IT WORKS:

- + Motorcycle and Marine programs must provide a signed copy of their program courses to be reviewed and approved by the MMI Education Director.
- + Motorcycle and Marine students must have graduated from secondary schools with active articulation agreements on file. Students must start their postsecondary training at MMI within one year of high school graduation to benefit from the articulation.
- + Prior to or during orientation week at MMI, articulating enrolled students wanting to earn advanced placement are required to take the advanced placement opportunities (APO) test(s) to assess their knowledge level in the course or courses for which they are attempting to receive advanced placement credit.\*
- + Each student who earns a passing grade on an APO test will receive credit for that course without needing to take it. The student still can take the same course but at the original tuition price.
- + Each student who does not earn a passing grade on an APO test will be required to take the corresponding course at MMI at the original tuition price.
- + Each articulating student who chooses not to bypass any courses with advanced placement will receive a \$1,000 articulation discount toward the tuition total.

Contact your Admissions Representative today for more information!

\*Failure to test prior to or during orientation week will disqualify a student from advanced placement.  
\*\*MARN-007 is available for advanced placement opportunity testing only if MARN-006 is successfully completed or the MARN-006 advanced placement opportunity test is passed with 70% or better.

## ADVANCED PLACEMENT

### MOTORCYCLE

Advanced placement in the MMI Motorcycle Technician Specialist program is offered for up to four eligible core motorcycle technology courses corresponding to the courses listed below. Curriculum review and approval by the MMI Education Director is required.

#### MMI MOTORCYCLE ELIGIBLE COURSES:

- Engines, Power Flow & Precision Measuring (MCCL-001)
- Suspension & Chassis Systems (MCCL-002)
- Machining Operations & Precision Measuring (MCCL-003)
- Electrical A – Design & Operation (MCCL-004)
- Vehicle Maintenance (MCCL-005)
- Engine Troubleshooting & Noise Diagnosis (MCCL-006)

### MARINE

Advanced placement in the MMI Marine Technician Specialist program is offered for up to four eligible core marine technology courses corresponding to the courses listed below. Curriculum review and approval by the MMI Education Director is required.

#### MMI MARINE ELIGIBLE COURSES:

- Engines (MARN-001)
- Lower Units/Outdrives (MARN-002)
- Rigging (MARN-003)
- Service Operations (MARN-004)
- Fuel & Lubrication Systems (MARN-005)
- Electrical Basics (MARN-006)
- Electrical Systems (MARN-007)\*\*
