ORDR 0006303

3. On May 31, 2018, Patient A (a female born in 1938) was seen by a different cardiothoracic surgeon for surgical evaluation of severe aortic valve stenosis. The physician recommended that Patient A undergo a transcatheter aortic valve replacement (TAVR).

4. On June 12, 2018, Patient A was seen by Licensee for surgical evaluation for TAVR. Licensee agreed with the recommendation for TAVR. The procedure was scheduled for June 20, 2018.

5. Licensee performed the TAVR procedure on Patient A on June 20, 2018, with another physician¹.

6. The procedure on June 20, 2018, was complicated by migration of the aortic valve bioprosthesis following deployment that resulted in coronary occlusion leading to profound cardiogenic shock and death. During the procedure, Licensee did not perform a sternotomy or otherwise open the patient's chest to resolve the complications.

7. In his Operative Note, Licensee documented that during preoperative evaluation Patient A was quite adamant about not receiving a median sternotomy; therefore, a median sternotomy and repair was not performed due to Patient A's wishes.

8. Licensee represented to the Department that Patient A had refused open heart surgery that included opening the chest, which limited the options that were available to save Patient A's life when the complications occurred.

9. Licensee failed to document in Patient A's health care record, at any time preoperatively, her refusal to undergo a median sternotomy in the event of operative complications.

10. In resolution of this matter, Licensee consents to the entry of the following Conclusion of Law and Order.
