LICENSEE. :
ORDER 0006734

Division of Legal Services and Compliance Case No. 18 CHI 004

The parties to this action for the purposes of Wis. Stat. § 227.53 are:

The parties in this matter agree to the terms and conditions of the attached Stipulation as the final disposition of this matter, subject to the approval of the Wisconsin Chiropractic Examining Board (Board). The Board has reviewed this Stipulation and considers it acceptable.

Accordingly, the Board in this matter adopts the attached Stipulation and makes the following Findings of Fact, Conclusions of Law, and Order.

FINDINGS OF FACT

1. Licensee Amy K. Slettedahl-Breidenbach, D.C., (DOB xx/xx/1973) is licensed in the state of Wisconsin as a chiropractor, having license number 3732-12, first issued on December 21, 2000, and current through December 14, 2020. Licensee's most recent address on file with the Wisconsin Department of Safety and Professional Services (Department) is in Onalaska, Wisconsin 54650.

2. At all times relevant to this proceeding, Licensee was employed as a chiropractor at chiropractor office (Office), located in Wisconsin.

3. Complainant is the mother of minor Patient A. She has filed several complaints against Licensee concerning Licensee's scoliosis treatment of Patient A and the use of a "DMX" imaging machine for diagnosis and treatment with the radiation exposure to Patient A.

- a. In case 15 CHI 002, Patient A's mother alleged that Licensee failed to properly treat Patient A's scoliosis and Licensee continued providing treatment even though Patient A was not improving and was getting worse. This case was closed after investigation for No Violation.
 - b. In case 16 CHI 018, Patient A's mother alleged that Licensee was exposing patients to excessive radiation during radiographs and DMX fluoroscopy of patients. This case was closed after investigation for Insufficient Evidence.
4. The instant case was opened at Complainant's request for reconsideration of 16 CHI 018 and submission of additional evidence of purported effects of radiation exposure to Patient A.
5. Department investigated DMX exposures through all available documentation and opinions from a health physicist.
6. Treatment records for Patient A provided by Licensee document three (3) minutes and fifty-three (53) seconds of DMX exposure between September 11, 2014 and December 10, 2014. There is also evidence of two (2) DMX studies where exposure time was not documented.
7. Additionally, these treatment records document standard radiographic exposures at each of Patient A's 36 office visits between July 4, 2014, and December 10, 2014. Licensee denies this quantity of x-rays and stated that a "scoliosis chair placement" x-ray was only performed once despite being documented on every visit note.
8. Licensee agreed in an in-person interview that the average person is exposed to 300 mrem (millirem) of radiation per year.¹ There are considerable differences of opinion on the amount of exposure from the DMX.
9. Licensee is "CLEAR"² trained and certified for treating scoliosis patients. This protocol calls for specific radiographs and recommends the use of the DMX machine. Co-Licensee stated that he was not overly concerned with Patient A's radiation exposure because he was trying to treat the patient and give him the "maximum opportunity to get better."
10. At the Department's request, Licensee provided all of Patient A's treatment records. Each visit note had an addendum dated March 15, 2015.³ Co-Licensee stated that upon a review of the records prior to providing them to the Department, he noticed that the neuromuscular re-education (NMR) or rehabilitation sections were inaccurate. The Co-Licensee completed the addenda from memory and pictures.

¹ 1 mSv = 100 mrem.

² CLEAR is an acronym for "Chiropractic Leadership, Educational Advancement, and Research."

³ Each addendum was approximately 3 – 8 months after the visit.

11. The December 5, 2014 visit note mentioned treatment in the office by Dr. Dennis A. Woggon (CLEAR founder) on November 29, 2014. This treatment included 53 seconds of DMX exposure. There was no note made of the November 29, 2014 visit.

12. In resolution of this matter, Licensee consents to the entry of the following Conclusions of Law and Order.
