RESPONDENT. : **ORDER 0007885**

Division of Legal Services and Compliance Case Nos. 21 NUR 282 and 21 NUR 802

The parties to this action for the purpose of Wis. Stat. § 227.53 are:

Sharon K. Brown, R.N.
Nekoosa, WI 54457

Wisconsin Board of Nursing
P.O. Box 8366

Madison, WI 53707-7190

The parties in this matter agree to the terms and conditions of the attached Stipulation as the final disposition of this matter, subject to the approval of the Wisconsin Board of Nursing (Board). The Board has reviewed this Stipulation and considers it acceptable.

Accordingly, the Board in this matter adopts the attached Stipulation and makes the following Findings of Fact, Conclusions of Law, and Order.

FINDINGS OF FACT

1. Sharon K. Brown, R.N. (Respondent), (Year of Birth 1982) is licensed in the state of Wisconsin as a registered nurse, having license number 246770-30, first issued on March 11, 2019, and current through February 28, 2024. Respondent's most recent address on file with the Department of Safety and Professional Services (Department) is in Nekoosa, Wisconsin 54457.

21 NUR 282

2. At all times relevant to this proceeding, Respondent was employed as a registered nurse, at a hospital, located in Wisconsin Rapids, Wisconsin (Facility).

3. The Department received a complaint that on or around April 1, 2021, Respondent had been acting strange during her weekend shift. She was making several trips to the bathroom and seemed “off” on several things.

4. Once Respondent’s actions were reported, the Facility began an investigation specifically reviewing Respondent’s narcotic administration. The Facility determined that Respondent had a much higher amount of controlled substance withdrawals, controlled substance waste transactions, and fentanyl waste than other employees.

5. The Facility investigation also uncovered an incident where Respondent injected morphine into the patient’s thigh, instead of via an IV as ordered by the patient’s doctor. Respondent did not seek a change order prior to injecting the morphine into the patient’s thigh.

6. On April 12, 2021, the Facility interviewed Respondent. Respondent denied diverting and stated her behavior on April 1, 2021, was due to bladder issues. Respondent stated she takes Gabapentin and is allergic to morphine. Respondent took a urine drug screen which came back negative for all controlled substances.

21 NUR 802

7. At all times relevant to this proceeding, Respondent worked as a traveling registered nurse, stationed in the ICU unit at a hospital located in Green Bay, Wisconsin (Hospital).

8. On November 27, 2021, around 11:44 a.m., Respondent was found unresponsive in the Hospital’s staff breakroom. Narcan and Romazicon were administered to her, and a puncture mark was found on her right arm. Four large 30 mL syringes with a small amount of blood were found in the garbage near where Respondent was found.

9. Respondent was transferred to the Hospital’s emergency department. She underwent a drug test, which returned positive for oxycodone. Respondent told Hospital personnel that she had an old prescription from an old injury and ingested one 10mg oxycodone pill at home on November 24 or 25, 2021.

10. The Hospital pulled Respondent’s medication administration and found there were five instances where Respondent removed controlled substances from the Pyxis machine but did not waste the medication, administer the medication, or document return or waste of the medication.

11. During an interview on January 11, 2022, conducted by the Division of Legal Services and Compliance, Respondent provided as follows:

- a. She sustained a back injury in August of 2021 and did not have medical insurance.
- b. She sought “care” online to save money. The “online provider” diagnosed her with backpain via online video/camera and/or online communication. Respondent could not recall the name of the provider or the website where she found the provider.

- c. The “online provider” mailed Respondent four (4) prescriptions of 30 mg Oxycontin, with each prescription containing 30 pills. She admitted to taking more pills than prescribed.
- d. Respondent exhausted her supply of Oxycontin in mid to late November 2021 and believes she was experiencing withdrawals.
- e. On November 26, 2021, she diverted fentanyl from the Hospital and injected herself at the hotel she was staying at. She stated that the fentanyl was “left over” and not taken from a patient.
- f. On November 27, 2021, Respondent reported to work while experiencing withdrawal symptoms. Respondent injected herself at work with what she believed to be fentanyl, but was actually a paralytic. Respondent became nonresponsive and went into respiratory arrest.

12. Respondent completed seven (7) days of inpatient treatment, in Illinois, in December 2021, due to drug/alcohol addiction issues. Respondent is currently receiving out-patient treatment.

13. In resolution of this matter, Respondent consents to the entry of the following Conclusions of Law and Order.

- C.14. The Approved Program shall require the testing of specimens at a frequency of not less than forty-nine (49) times per year (one of which may be a hair test at the Board's discretion), for at least the first year of this Order. Thereafter the Board may adjust the frequency of testing on its own initiative at any time, and/or Respondent may petition for modification of testing frequency per paragraph D.5.
- C.15. If any urine, blood, sweat, nail, hair, saliva, or other specimen is positive or suspected positive for any controlled substances or alcohol, Respondent shall promptly submit to additional tests or examinations, as the Board or its designee shall determine to be appropriate, to clarify or confirm the positive or suspected positive test results.
- C.16. In addition to any requirement of the Approved Program, the Board or its designee may require Respondent to do any or all of the following: (a) submit additional specimens; (b) furnish any specimen in a directly witnessed manner; or (c) submit specimens on a more frequent basis.
