Division of Legal Services and Compliance Case No. 22 DEN 164

The parties to this action for the purposes of Wis. Stat. § 227.53 are:

The parties in this matter agree to the terms and conditions of the attached Stipulation as the final disposition of this matter, subject to the approval of the Dentistry Examining Board (Board). The Board has reviewed this Stipulation and considers it acceptable.

Accordingly, the Board in this matter adopts the attached Stipulation and makes the following Findings of Fact, Conclusion of Law, and Order.

FINDINGS OF FACT

1. Licensee Aileen Jong, D.M.D., (Year of Birth 1995) is licensed in the state of Wisconsin to practice dentistry, having license number 1002633-15, first issued on July 13, 2021, and current through September 30, 2023. Licensee's most recent address on file with the Wisconsin Department of Safety and Professional Services (Department) is in Watertown, Wisconsin 53094.

2. At all times relevant to these matters, Licensee practiced dentistry at a dental clinic located in Watertown, Wisconsin (Clinic).

3. On August 9, 2021, a thirty-one year old male patient (Patient A) presented to the Clinic for an emergent examination with complaints of a broken tooth following an accident. On

examination, tooth #10 was fractured horizontally and 2-3mm of coronal tooth structure remained above the gumline. Licensee discussed treatment options and referred Patient A to an endodontist for root canal therapy on tooth # 9 and # 10. Licensee's treatment plan was for a post, core, and crown for tooth # 9 and #10 after the endodontist completed the root canal therapy.

4. On August 11, 2021, the endodontist performed root canal therapy on tooth # 10, and decided to re-evaluate tooth # 9 in two weeks.

5. On August 17, 2021, Patient A presented to the Clinic for follow-up. Licensee cemented a post wire in the canal of tooth #10 using RelyX cement and splinted to adjacent teeth with orthodontic wires. Licensee did not take a radiograph of the finished work. Patient A was instructed to follow up in two to three weeks.

6. On September 14, 2021, Patient A presented to the Clinic to have the post wire on tooth # 10 examined. Licensee examined the patient and a radiograph of tooth # 10 was taken. Licensee planned to proceed with post, core, and crown prep at the next appointment.

7. On September 27, 2021, Patient A presented to the Clinic. After taking off the splint from adjacent teeth, Licensee utilized ortho pliers to remove the post wire from tooth #10. Cement remained in the canal and Licensee attempted removal using gate glidden drills. However, Licensee encountered difficulty in removing the cement and the canal was laterally perforated through the tooth structure into bone. Licensee concedes that unintended iatrogenic injury occurred during this process and that tooth #10 was no longer salvageable.

8. In resolution of this matter, Licensee consents to the entry of the following Conclusions of Law and Order.
