Quality Assurance Questionnaire: Enrollment

The purpose of this document is to communicate important concepts and points about the program you're enrolling in. We ask that you be completely honest in your responses as this document will be used as a reference should there be any dispute.

1. At no time during devCodeCamp advertising, information session, 1-on-1 meeting, or at any other time during my v application process was I guaranteed employment or guaranteed a specific income because I enrolled at devCodeCamp.

2. I was provided access to the Student Catalog.

3. I have been given the price of the program.

4. I verify that I do have a High School Diploma/GED.

5. I fully understand my program's class days and hours.

6. My success in this program is greatly dependent upon regular attendance.

7. It has been explained that all courses/materials are presented in English.

8. I understand that devCodeCamp may assist in my job search provided I graduate, however, it's ultimately my responsibility to secure a job.

9. Although devCodeCamp has relationships with companies and organizations that have hired or interviewed graduates, the enrolling student cannot depend on those relationships to gain offers of employment after graduation.

10. I understand when receiving mentoring from instructors that are not listed in the standard curriculum I am accumulating program hours that would be used in any refund calculation.

11. I'm aware that graduation requirements are a final GPA of 3.0 and a fully functional individual capstone project that was approved by the instructional staff of devCodeCamp.

12. I've been told that the program I'm enrolling in is not taught in the traditional sense I might think; in that lectures and demos are recorded, I'm expected to watch all recordings, and then I'm expected to work on the topic labs and projects. Topics are taught in short sprints of lecture and labs.

13. I've been told that as the program progresses the instructors will require independent research and problem-solving on my part and that Googling the internet for software or ideas replaces the need for books and documentation; Google is an industry accepted tool for the software development process.

14. I understand that program I am enrolling in is rigorous and involves learning a large amount of information and skills in a condensed amount of time, thus devCodeCamp advertises itself as a coding bootcamp. Short in timeframe and intensive.

15. Graduates receive a "Certificate of Completion" only. The program you're enrolling in doesn't offer college credits nor transferability to any college or university for credit. The program is not accredited but is licensed by the State of Wisconsin.

16. devCodeCamp staff has not made any other oral representations to me that would change any of the meanings of the statements above.

Do you have any concerns? If so briefly state any concerns. If none, write "none".

I attest that I've read and understand the statements listed in this document. I've initialed each statement to demonstrate my understanding and agreement with each as listed above on the aforementioned pages.
